

IN THE SPECIFICATION:

Please replace paragraph [0009] with the following new paragraph:

[0009] ~~JP-A-2004-233952~~ JP A 2004-100042 discloses that, in a copper alloy containing 0.15 to 0.5% of Zr, grains can be reduced about 20 μm or less in the mean grain size by performing solution heat treatment and deformation process, which is to add distortion to the alloy.
